

## How to setup easy-to-use IPTV with MOI+/MOIPro/Matrix

A lot of people think IPTV is a complex project, Now TBS release a easy-to-use IPTV solution with our MOI+/MOIPro/Matrix, it use TVheadend as server and android apk TBSIPTV as client,

### First :

Make sure that you are using the latest firmware of MOI+/MOIPro/Matrix, you can check on our download page for every firmware:

<http://www.tbsdtv.com/download>

### Second:

If you do not know how to set TVheadend ,Please read this topic to see how to set TVHeadend with our MOI+/MOIPro/Matrix

<http://www.tbsdtv.com/download/document/common/How-to-configure-Tvheadend-for-DVB-tuner.pdf>

### Third:

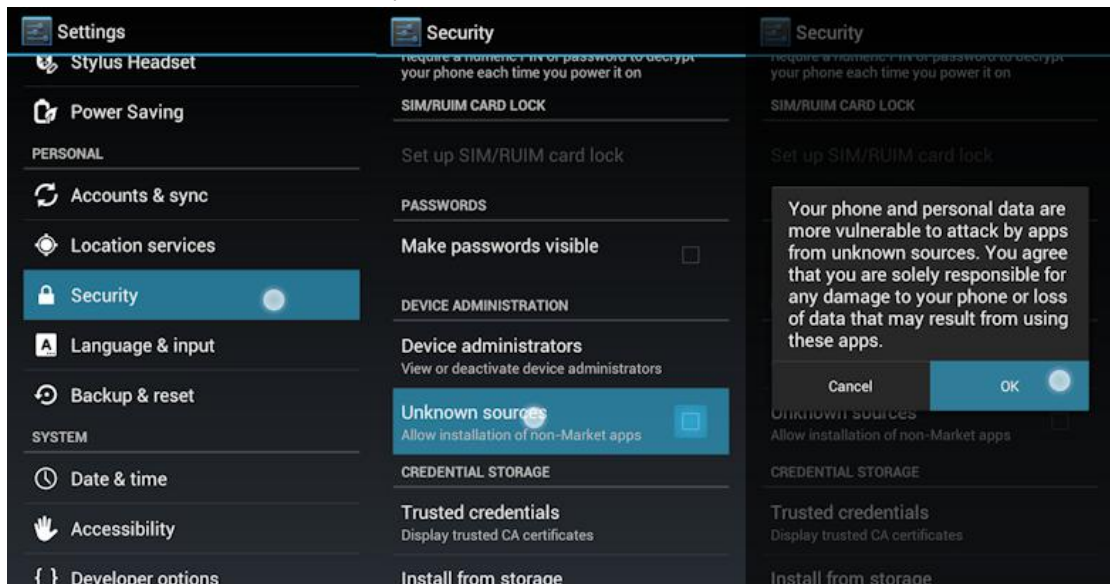

After finished the TVheadend config. Then you can install our TbsIPTV apk to watch TV

Download apk from our download page

<http://www.tbsdtv.com/download/document/iptv/tbsiptv-live.apk>

### Fourth:

Enable Andorid Unknow sources apk install

### Fifth:

Run TbsLive apk

10:17

tbslive

After install TbsIPTV apk it will auto scan and find all of the MOI+/MOIPro/Matrix 's in the same

local network, and then when you start Tvheadend in MOI+/MOIPro/Matrix , the channels received by all of the MOI+/MOIPro/Matrix's will be listed in Tbsiptv-live apk channel list,easy choose one you want to watch.
